

I-Remit Employer Electronic Portal

Why SEIU I-Remit?

Increased Efficiency

Upload files directly from your payroll software to the SEIU I-Remit system or utilize the pre-listed roster generated by the system, eliminating the need to manually create the remittance reports

Employee Enrollment

End users can enter enrollment details for brand new members, provide changes to coverage elections and address on existing employees. Options are available to add/or change eligible dependents

Reduced Errors

Reduces mathematical errors by automatically calculating remittance amounts with rates from current CBAs

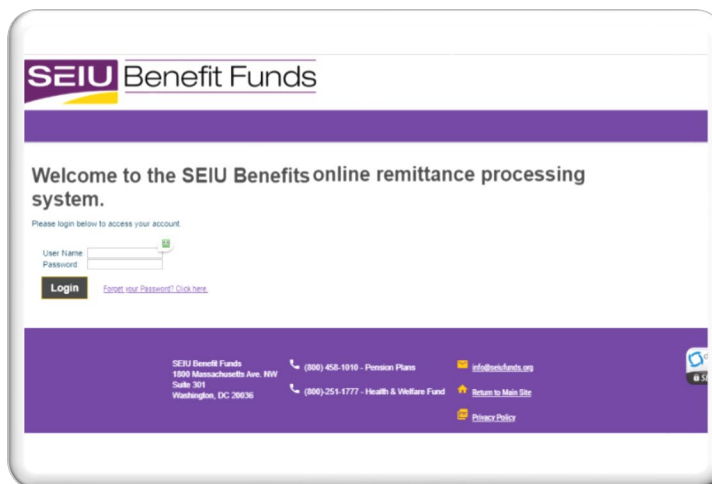

Improved Record Keeping

The system retains time-stamped submission files for future reference
Ability to view and print previously submitted reports, roster forms, and other payments

What is SEIU I-Remit?

SEIU I-Remit Employer Portal is a secure online tool that allows Employers to submit and manage their monthly premiums using a tablet, smartphone, laptop, or computer.

It eliminates the need for completion of the paper forms with remittance data and saves time and money for both the Employer and Fund Office.

The SEIU I-Remit System accurately captures, manages, and transfers contribution data electronically, allowing you to upload and submit reports online and make direct ACH electronic payments to the Fund Office. Payments by Wire Transfers or Check are also supported.

How It Works

Enrolled Employers are assigned unique credentials to identify each Bookkeeper. Once the Bookkeeper is logged into the SEIU I-Remit System they can select the remittance reporting period and contract for submission.

Additional features will include the ability to add and/or terminate Participants at the time of data entry, as well as make changes to the Employee's job classification.

On submission of the report, the system automatically transfers remittance data to the Fund Office's Benefit System.

All data transfers are encrypted, providing maximum security and privacy. The system's historical reporting feature allows Employers to view previously submitted electronic reports on demand.
